

Designed for Kids!

A child is not just a small adult...

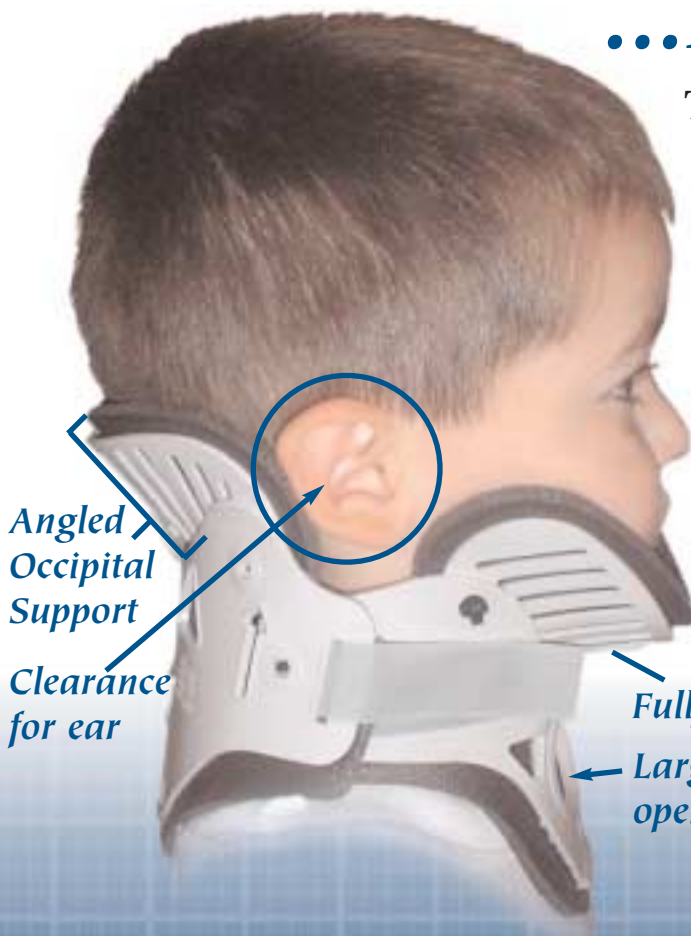

...Kids are different!

Their c-collar should be too.

Only NecLoc Kids[®] measures up for your most important patients.

- 3 unique sizes to fit children 0 – 12 years
- Unsurpassed NecLoc[®] immobilization
- Maintains proper airway and c-spine alignment
- Color Coding Kids sizing
- Folds flat
- X-ray, MR & CT transparent

Airway. C-Spine. KIDS!

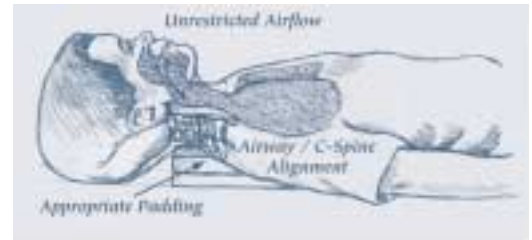

A true pediatric collar...

takes into account the significant differences between kids and adults. NecLoc Kids® does. Each size is individually engineered for the specific age and stage of the child's growth to maintain optimal airway and c-spine alignment. Each size takes into account these key differences:

- Relative head size
- Relative neck length
- Relative flexibility of neck and weakness of developing musculature.

A true pediatric collar...

uses a proven pediatric sizing system. NecLoc Kids® does. Each collar is color-coded to match the appropriate Broselow-Luten size range. In fact, it is the first and only pediatric extrication collar designed well enough to carry the Color Coding Kids seal of approval - your sign that sizing and application is simple and fool-proof.

Airway.
C-spine.
Kids.

NecLoc Kids® puts the airway and c-spine back into the ABC's of EMS care for kids.
